SEEDERS • AERATORS • SPREADERS • SPRAYERS • MIXERS • SLASHERS • CULTIVATORS • WRAPPERS

The IJD Series is designed as a cost-effective Mounted spreading solution best used on smaller farms and an even better choice for uneven or hilly terrain than ground-driven spreaders.

Drawing power from the tractor's PTO shaft, the IJD's lone spinner can easily disperse both granular fertilizers and pellets over 6-14 meters in three different patterns.

- ✓ **Single Disc Spreader**
- ✓ **Heavy Duty Plastic Hopper**
- ✓ **Three Spreading Patterns between 90°-180°**

TECHNICAL SPECIFICATIONS

MODEL	IJD-400P	IJD-700P	IJD-900P
Capacity (L)	400	700	900
Spreading Width	8-16m	8-16m	8-16m
Width Adjustment	180-90 right or left	180-90 right or left	180-90 right or left
Shutter Control	Manual	Manual	Manual
Weight (KG)	126	137	144
Length (mm)	1380	1380	1380
Height (mm)	950	1230	1400
Width (mm)	1430	1430	1430
Power Type	PTO	PTO	PTO

Bang for the Buck Spreader

Aside from its price point, there's nothing cheap about the IJD series. The frame, body, and gearbox are made from strong, heavy-duty steel to the machine's maximize structural strength and durability.

All crucial components—the prevention plate, spinner disc, and vanes—are made of stainless material to reduce corrosion due to frequent contact with chemical contents.

Consistent Results

The range is adjusted by using a precise rate control lever that can be locked in place on the desired rate and pace by installing a lever guide pin.

This, combined with the PTO connection, ensures a uniform and even dispersal of fertilizer contents even in unfavorable terrain. Meanwhile, manual calibration is 90°-180° in three different patterns: Flat-top, Oval, and Pyramid.

Weather-Resistant Spreaders

The IJD Series is available in 400-, 700-, and 900 L variants. All units come with a UV-rated Poly hopper which essentially improves its ability to resist the harsh weather conditions encountered in the Australian farmscape.
