

FERTILIZATION, TRANSPORT,
POTATO TECHNOLOGY

uniamachines.com

MS / MX

Double disc fertilizers with hoppers of 400 to 3000 litres capacity and a working width of up to 36 metres. The most common equipment in small and medium farms, but also efficient in large agricultural companies.

MS			
MODEL	CAPACITY [L]	WIDTH [m]	POWER [HP]
400	400	10-24	50
500	500	10-24	50

End sowing cover
for precise sowing by the field boundaries

Loading hopper sieves
with fine mesh enable smooth fertilizer spreading.

Precise sowing
up to 24 meters

MS 500

Double bar system
for precise adjustment of the sowing dose and opening/closing

Easy access
for the adjustment of the sowing dose and working width

Special painting coats
full powder painting of the entire fertilizer

MX			
MODEL	CAPACITY [L]	WIDTH [m]	POWER [HP]
850	850	10-24	60-70
1200	1200	10-24	80-90
1600	1600	10-36	100-120
2100	2100	10-36	140-160
3000	3000	12-36	above 180

Sowing discs
with stepless working width adjustment up to 36 metres

Sowing mechanism
made of stainless steel

MX 850

Optionally
a stainless steel hopper available.

When the hopper is being filled, the tarpaulin is folded up
it enables the spreading of fertilizers even at adverse weather conditions.

BYK loader
enables fast loading of fertilizer big bags of up to 1000 kg.
